

Install the VUE Testing System

How to Install the VUE Testing System

Two documents exist to guide you through the process of installing the Pearson VUE Testing System at your site. The document most often used is the Quick Install Guide which can be found at Pearsonhelp.com under Other links in the lower right corner of the page. Click the [Quick Install Guide link](#) to review or print. It is a very good guide for most technical individuals.

Another option to install the VUE Testing System can be found by visiting the VUE Support Services webpage and choosing the Installation guide in the upper right-hand corner at <https://vss.pearsonvue.com/>. The guide is very comprehensive in the steps required to complete the installation. Your Pearson VUE username and password are required to gain access to the <https://vss.pearsonvue.com/> website. To reset your password for this site, please use the Account Recovery Tool link.
