

Run TDFT's annually to check internet connection

Many exams delivered through Pearson VUE have specific internet connectivity requirements. To determine whether your test center qualifies to deliver these exams, you must run the following test driver functionality tests (TDFTs):

- TDFT-IBTVend-MinSpec (IBT-TDFT)
- Athena-Browser Edition readiness check (TDFT-A-BE)

Pearson VUE recommends that you run these TDFTs on each delivery workstation at least once a year. For more information about scheduling and delivering these TDFTs, refer to the documents linked below.

IBTVend-MinSpec Instructions (U.S. Letter)
